

ORACLE TRAINING

Oracle Database Programming

SQL

- Introduction to RDBMS
- Data types
- Sql Languages
- Constraints
- Single row and multirow functions
- Conversion functions
- Conditional expressions
- Operators
- SET operators
- Joins
- Sub Queries
- Co-related Sub Queries
- Views
- Sequence
- Synonyms
- Indexes
- User Access
- Rollup and Cube
- Time Zone
- External Tables
- Multiple Table Inserts
- Workshop With Scenarios
- Assessment

PL/SQL

- Introduction to PLSQL Environment
- Variables and Data Types
- Languages
- Control Structures
- Cursors

- Exceptions Procedures
- Functions
- Triggers
- Packages
- Oracle inbuilt Packages
- Dynamic SQL
- REF Cursors
- PLSQL Tables
- Workshop with Scenarios
- Assessments

SQL Tuning

- Oracle optimizer modes
- Interpreting execution plan
- Trace Events
- Using proper indexes
- Workshop with Scenarios
- Assessments
